

MAMIDISSETTY KESHA TEJA

Hyderabad, Telangana | 8801080683 | keshav.tej@gmail.com

Professional Summary

Result-driven engineering professional with over 10 years of comprehensive experience spanning cloud infrastructure, automation, and enterprise systems administration. Proven expertise in orchestrating Kubernetes clusters, architecting AWS/GCP cloud environments, and eliminating operational toil through scripting. Strong foundation in managing complex, multi-site hybrid environments, ensuring high availability, and driving proactive incident resolution.

Technical Skills

- **Cloud & Orchestration:** AWS (EC2, S3), GCP (GKE, GCS), Kubernetes, Docker, VMware vSphere
- **CI/CD & Automation:** Jenkins, GitHub, Spinnaker, Ansible, Python, Bash, PowerShell
- **Observability:** New Relic, Prometheus, Grafana, Instana, Nagios, CloudWatch
- **Systems & OS:** Linux (RHEL, CentOS, Rocky Linux, deep understanding of kernel architecture and CLI), Windows Server, IBM i AS/400
- **Networking & Security:** Zscaler, Fortigate, Cisco, Active Directory, DNS/DHCP, SCCM

Professional Experience

Copart India Center | Hyderabad, Telangana Cloud & DevOps Engineer (July 2023 – Present)

Cloud Infrastructure & Kubernetes Orchestration

- Architect and manage production cloud environments across **AWS** (EC2, S3) and **GCP** (GKE, GCS), ensuring high availability and resilient on-premise to cloud database backups.
- Orchestrate **Kubernetes** clusters, managing complex deployments via **Spinnaker**, executing version upgrades, and conducting deep performance analysis (thread/heap dumps) to resolve scaling bottlenecks.
- Containerize legacy applications using **Docker** and manage virtual machine lifecycles (balancing, patching, decommissioning) within **VMware vSphere**.

Automation, Monitoring & Observability

- Designed and executed a comprehensive 5-month action plan to automate Level 1 (L1) infrastructure health checks and alert auto-remediations using **Python, Bash, and Ansible**, integrating seamlessly with **Jenkins** pipelines.
- Set up and maintain full-stack observability solutions (**New Relic, Nagios, Prometheus, Grafana**) to provide L2/L3 real-time system tracking, performance alerting, and immediate issue troubleshooting.

Global Operations & Cross-Functional Support

- Lead incident response and strict Change Management workflows for multi-datacenter setups, ensuring rapid resolution of network device (Cisco, Fortigate) and ISP connectivity issues across worldwide offices.
- Administer hybrid enterprise systems, providing expert troubleshooting for **Linux** environments, Windows servers, and **IBM i AS/400** platforms.
- Deliver structured Knowledge Transfer (KT) sessions to cross-functional engineering teams, ensuring continuous, streamlined support for daily operations and service health.

Copart India Private Limited | Hyderabad, Telangana Windows System Administrator *(March 2020 – June 2023)*

- Administered massive-scale VMware environments, managing VM lifecycles (cloning, P2V migrations) across ESXi hosts via vCenter.
- Managed enterprise Identity and Access Management through Active Directory (ADDS) and Office 365 for a global workforce.
- Deployed and configured File Servers and HP ProLiant Gen 10 hardware, utilizing iLO for remote administration.

Karvy Data Management Services | Hyderabad, Telangana Windows Administrator *(February 2018 – March 2020)*

- Enforced stringent Group Policies (GPOs) to harden Windows environments for Information Security Management System (ISMS) and external client audits.
- Leveraged SCCM for enterprise-wide application packaging, automated deployments, and comprehensive system compliance reporting.

Cameo Corporate Services Limited | Hyderabad, Telangana System Administrator *(December 2015 – February 2018)*

- Directed IT infrastructure and hardware operations across 53 regional branches, maintaining strict SLAs and 99% uptime.

Projects & Continuous Development

- **Web Development:** Architecting and coding a personal portfolio website utilizing HTML and CSS to document technical workflows and showcase infrastructure projects.
- **Edge Computing & AI:** Evaluating single-board computer architectures, specifically the Qualcomm Rubik Pi 3, for deploying lightweight, automated AI systems.

Education

- **M.Tech in Computing Systems & Infrastructure Engineering** | Birla Institute of Technology and Science (BITS), Pilani (2025)
- **B.Tech in Electronics & Communication Engineering** | Malla Reddy Engineering College (2015)
- **Diploma in Electronics & Communication Engineering** | C.R. Polytechnic (2012)
